

Practice Problems #5

1. True or False. Justify your answer:

- (a) Any list of five real numbers is a vector in $\mathbf{R}^5$.
- (b) The vector u results when a vector $u - v$ is added to the vector v .
- (c) The weights $x_1, x_2, \dots, x_p$ in a linear combination $x_1u_1 + \dots x_pu_p$ cannot be all zero.
- (d) An example of a linear combination of vectors v_1 and v_2 is the vector $(1/2)v_1$.

Answers or Hints are on page 2.

#1(a): T, justify!

#1(b): T, justify!

#1(c): F, justify!

#1(d): T, justify!
